

D204 – The Data Analytics Journey

Welcome, Study Plan, and Course Pacing Guide

last update: 04.04.23

NOT SURE WHERE TO START IN THE COURSE?? You are in the right place!

Your D204 instructor team has put together the following guide full of resources and course tips to help you get the most out of this course and to help you pass the course in the most efficient way possible!

Welcome to D204 – The Data Analytics Journey

The Data Analytics Journey gives an overview of the entire analytics life cycle. Learners gain fluency in data analytics terminology, tools, and techniques. The course contextualizes the data analytics journey with organizational metrics and requirements to position graduates to answer critical questions for businesses and employers. This course has no prerequisites.

D204 STUDY PLAN OUTLINE (with Tips and Extra Resources!)

This study plan outline is a result of student feedback on what has helped your fellow Night Owls be successful!

Many students find that the most efficient way to complete this course is by working through the Learning Materials before attempting the pre-assessment and Meeting with the Course Instructor to review the pre-assessment report before attempting the objective assessment.

There may be some aspects of the course you can complete using skills you might remember from previous experience – like the Data Analytics Framework and some concepts of The Data Analytics Journey – but there will likely be some aspects of the course that will be more unfamiliar to you – like Tools and Techniques, Project Planning and Organization Needs.

If you encounter a concept in the course that you aren't as familiar with, that is an excellent time to consult the course materials and the supplemental resources, and **Video Resources in Course Announcements** for help in understanding new concepts and seeing examples of those new skills in action!

D204 RECOMMENDED STUDY PLAN

The study plan below has helped many students in the course be successful. However, everyone learns differently. Please schedule a time to speak with your course instructor to discuss building a customized study plan that works best for you!

1. **Read the Learning Materials**, including the Supplementary Resources and Teach Back Study Plan in the Course Chatter Group Files.

- a. You can access the Learning Materials by clicking on “Go To Course Material” in the center of the D204 main page.
- b. After reading through the Learning Material, consider watching the **Webinar Recording in Course Announcements** for more detailed explanations about each Phase of The Data Analytics Life Cycle.

2. **Work through the Learning Resources and attempt your first pre-assessment; complete the Supplementary Resources and attempt your Second pre-assessment.** For each section:

- a. Download and complete D204 Teach Back Study Plan from Group Files under Course Chatter.

PRO TIP: Meet Your Instructor!! You are strongly encouraged to schedule not less than 30-45 minutes with the Course Instructor to review your Pre-assessment Report. Students who meet with the Course Instructor increase their chances of passing on the 1st Objective Assessment attempt.

3. Before you attempt your first OA, be sure to read through the Learning material, Supplementary Resources, and Teach-Back-Study-Plan. Then meet with the Course Instructor to review your Preassessment Report to help you increase your chances of passing the Objective Assessment on your first attempt!
4. Attempt your Objective Assessment!
 - a. If you do not pass on your first attempt, don't panic! 😊 Schedule time with your Course Instructor to discuss your next attempt study plan.
 - b. If you are unsure about how to request for the next attempt approval, review the Learning material and supplementary resources and watch D204 Video Resources for extra tips and resources. You can also **reach out directly to your course instructor.**

D204 COURSE PACING GUIDE

Many students can complete this course in about four weeks. To meet this **30-day Challenge**, we suggest the following pacing:

- **Week 1**: Complete Section 1: The Data Analytics Life Cycle, Section 2 Data Analytics Tools and Techniques and Section 3 Organization Needs.
- **Week 2**: Complete Section 4: Ethical and Legal Issues, Section 5: Project Planning/Teamwork and Collaboration.

Week 3: Complete Supplementary resources: Introduction, Section 1, Section 2, Section 3, Section 4, and Section 5. Plan to complete your storytelling in week 3.

- **Week 4**: Complete D204 Teach Back Study Plan and Take Pre-assessment attempt 2. Meet with the Course Instructor for not less than 30-45 minutes to review your Pre-assessment.
- Schedule your Objective Assessment and contact your Course Instructor for additional clarifications.
- Once again, if you do not pass on your first attempt, don't panic! No worries, schedule time with your Course Instructor to discuss a personalized study plan and prepare for the next attempt.
